Symptoms of rabies may include unexplained aggression, impaired locomotion, varying degrees of paralysis, and extreme depression or viciousness. Individual animals maybe affected in different ways. Some animals will display the well known "vicious" form, while others, displaying the "dumb" form, will merely appear sick or dazed and become very lethargic. Once an animal begins to show signs of rabies it is likely to die within 5 days. All dogs must wear a collar or harness with their tags or identification.
